

# Message from Vice President, SAFOMS

---

Dear SAFOMS Readers,

I am delighted to give a message for the 1st edition of SAFOMS journal. SAFOMS was the brain child of Dr Behram Anklesaria (late). It was his vision to unite the South Asian Countries. Our main focus is on the medical aspects and management of menopause among South Asian population and to have such forum, where medical and nonmedical personnel will meet and contribute to improve the quality of life of old age groups. In addition, there will be social interaction in our neighbouring countries and create the environment of peace and harmony.

As envisioned by Behram, SAFOMS has moved paces in the last 2 years due to the untiring efforts of all its members who strived to build bridges and foster relationships among South Asia. Dr Jaideep Malhotra deserves special credit in publishing the journal.

Since, its establishment in 2010, SAFOMS has regularly organized local scientific conferences and 2nd biennial SAFOMS conference is hosted by Pakistan Menopause Society. We hope to build a research projects in our region and publish it in this journal, as it will be a mutual benefit to us.

I am looking forward to having a successful launch of the Journal in the 2nd biennial SAFOMS conference in Karachi, Pakistan.
